

Readme

This application runs with Heroku server, PostgreSQL database, and Dialogflow bot platform.

So, this code won't run independently.

For the main code, You need to check the app.js file.

Also, the token in the code is private. Please do not share it.

Modules that has been used for the development are not included here.

Train-dataset.zip file is the dataset I used to train my chat-bot's small talk function and restaurant finder function.

Other than that, It is always welcome to give any feedback to the code or reference it for your own chat-bot.
